

Contractors to drill 104 wells

Published on September 12, 2017

66 exploration wells + 38 development wells

- The 4 tenders from round one and three for round two have triggered the drilling of 104 wells. Of these, 66 are exploratory and 38 are for development.
- Of the plans approved for tender one, two and three of round one, the drilling of 51 wells, 13 for offshore exploration and 38 for onshore development, were acknowledged.
- For tenders R1.4, R2.1, R2.2 and R2.3, there is an investment commitment equivalent to the drilling of 53 exploratory wells *; of which 26 will be drilled onshore and 17 offshore.
- The 66 exploratory exploration wells are equivalent to Pemex's exploratory drilling of the last 3 years (2014-2016).

* Estimated based on additional investment bids from winning bidders.
