

CNH participates in 18 collaboration agreements with universities and research centers

Published on November 06, 2018

CNH's Collaboration Agreements

To date, the National Hydrocarbons Commission (“CNH”, for its initials in Spanish) has signed 18 collaboration agreements with 14 universities and 4 research centers. It is in the process of signing 9 more agreements.

These agreements establish mechanisms to access information held in the CNH’s National Hydrocarbons Information Center, and are key to the future of Mexican human capital in engineering, as well as to the development of science and technology in the national oil sector.

In addition, the collaboration agreements encourage transparency and accountability in the sector.

16 agreements have been signed with national institutions: 4 in Tabasco, 3 in Veracruz, 3 in Mexico City, 1 in Baja California, 1 in Coahuila, 1 in the State of Mexico, 1 in Nuevo Leon, 1 in Oaxaca and 1 in Puebla. The CNH has signed two international agreements, both with the University of Austin in Texas, U.S.A.
