

2019 Production Results from Oil & Gas Contracts

Published January 28, 2020

OIL PRODUCTION FROM CONTRACTS

In 2019, **production from contracts reached annual average production levels of 84.4 thousand barrels per day (mbbl/d).**

This annual average represents a 48% increase with regards to annual average production in 2018.

During the month of December 2019, production from contracts reached 103 mbb/d, comprised of the following:

- 74.8 mbb/d produced in Pemex contract migration areas,
- 16.7 mbb/d produced in contractual areas tendered in bidding rounds and
- 11.4 mbb/d produced in Pemex farm out areas.

For more information, please visit the Hydrocarbons' Information System (<https://sih.hidrocarburos.gob.mx/>), in the section "Production", subsection "Production per Contract".
