Centro Nacional de Información de Hidrocarburos

**The Centro Nacional de Información de Hidrocarburos (CNIH) is the area within the CNH responsible for** compiling, gathering, safeguarding, managing, utilizing, analyzing, updating and publishing **the information and statistics related to** reconnaissance and surface exploration, as well as the information regarding the **exploration and extraction of hydrocarbons**.

In compliance with its mandate, the CNIH presents the most notable information on the Mexican hydrocarbon industry, comparable with the information published by other international statistical information systems.

The following table shows the main petroleum statistics available around the world.
