## Natural Gas Production from Contract Areas

Source: National Hydrocarbons Commission, annual natural gas production without nitrogen.  
MMcfd: Million cubic feet per day.

In 2020, natural gas production from contract areas reached 240 million cubic feet per day (MMcfd). This volume represents 6% of national production – 3.843 billion cubic feet per day in 2020 – and shows an increase of 16% relative to natural gas production in 2019.

This production originated from 40 contract areas, in particular from: CNH-M3-MISION/2018 (113 MMcfd), CNH-A4.OGARRIO/2018 (19 MMcfd) and CNH-R01-L02-A1/2015 (15 MMcfd).

In addition, two contract areas began commercial production during 2020: CNH-R01-L02-A2/2015, operated by Hokchi Energy and CNH-R02-L03-VC-01/2018, operated by Bloque VC 01.
