Notes:

Figures subject to revision and may not match due to rounding.
 Production corresponds to well production volumes, including production tests, reported by contractors.
 Liquid hydrocarbons: Refers to the sum of oil and condensate.
 The average daily production for the period is obtained by calculating the sum of the total volume for each month divided by the number of calendar days in the period.
 The natural gas figures do not include nitrogen.
 The geographical location is defined based on the zone where the highest percentage of surface area is covered.
